## Product Description

The Spartan Mosquito Eradicator is a uniquely effective, long-lasting, continuous mosquito control system. The Spartan Mosquito Eradicator also doesn't require batteries or electricity, just water!

**HOW IT WORKS** Spartan Mosquito Eradicators emit the same triggers that draw mosquitoes to people. Once mosquitoes feed on the water solution, they perish before they can breed again.

**EFFECTIVENESS** Spartan Mosquito Eradicators will reduce the mosquito population in the first 15 days with up to 95% efficiency. Eradicators are effective for up to 90 days. One box will cover up to 1 acre of land. If mosquito season has already started, double up to 2 boxes per acre to catch up. The Spartan Mosquito Eradicator is most effective when deployed right before mosquito season begins.

**GET THE MOST OUT OF YOUR PURCHASE** Follow these tips to get the most out of your Eradicators:

- Deploy 1 box (2 tubes) per acre of land. Double your deployment (2 boxes per acre) if mosquito season has started.
- Follow the deployment guidelines that most accurately describe your property.
- Place your Eradicators away from human activity and buildings.
- Check the water levels periodically. Hot climates will evaporate the water faster than normal and flooding can occur in heavy rains. Maintain the water level between the full and low level lines throughout each deployment.

### WHY CHOOSE SPARTAN

- Spray services are intermittently effective, expensive, and their recurrent costs add up over time. Plus, they can be potentially harmful. The American Mosquito Control Association, a scientific, educational, not-for-profit group that is devoted to the suppression of mosquitoes, does not endorse the use of timed misting systems. These put unnecessary pesticides in the environment that kill non-target insects and promote resistance in insect populations.
- Candles and torches emit smoke to confuse and ward off mosquitoes. They have a limited effective radius (they normally claim up to 15 feet, but sometimes have an effective radius of six to seven feet when the air is still) and are subject to winds and breezes, rendering them close to useless.
- Spray-on repellent used on the skin is a summertime go-to to provide temporary protection, but finding one that isn't full of harmful chemicals can be challenging. Synthetic repellents containing the DEET chemical compound have been used for over 50 years, but they do have shortcomings. Any spray containing organic solvents has the capability to dissolve certain plastics, and can also be an environmental pollutant. So, while spray-on repellents can be temporarily effective in warding off local mosquitoes, they do not decrease the mosquito population, only work for a short amount of time, and can pollute the environment.
- Bug zappers have been proven ineffective in killing mosquitoes. Studies have shown that they fail to attract mosquitoes, and instead kill thousands of bugs that are harmless and necessary to the ecosystem, such as moths and fireflies.

Protect your environment from mosquitoes. Invest in Spartan Mosquito Eradicators and take back your outdoors the Spartan way!

## Instructions

### 1) Prepare the Eradicators

- Remove Spartan Mosquito Eradicators from the box.
- For each Eradicator, remove the temporary white cap and fill with WARM water to the fill line indicated on the back of the Eradicator.
- Replace white cap. SHAKE THOROUGHLY. Remove white cap.
- Attach hooks to black caps for hanging, and secure black caps to the top of the Spartan Mosquito Eradicators.

2) Hang the Eradicators

- Hang Spartan Mosquito Eradicators along the perimeter/property line of the area to be protected, no more than 180 feet apart. If the property is smaller than one square acre, and there are no major mosquito attractors such as a wooded area or a water feature, hang the Eradicators on opposite corners of the property.
- Be sure to hang the Eradicators away from areas where people gather, since mosquitoes will gather near the Spartan Mosquito Eradicators to feed.
- If you have woods, heavy vegetation, or a water feature that attracts mosquitoes, you should hang at least one Spartan Mosquito Eradicator near or within that area, away from people.
- The ideal height to hang the Spartan Mosquito Eradicator is about six feet above the ground.
- The ideal place to hang Spartan Mosquito Eradicators is in a tree against the trunk on a sturdy branch, or just inside a bush, where they will be shaded and be partially protected from rain. This prevents evaporation and allows some water replenishment from rain.
- Be sure and place your Eradicators at least 100 feet from where you gather in your yard.

3) Results

- With proper placement, the mosquito population in the area will diminish by up to 95% in 15 days or less.

Placement at Start of Mosquito Season

Typical 1 Acre Residential Lot	Wooded 1 Acre Residential Lot	Wooded 1 Acre Residential Lot	Typical 1 Acre Residential Lot with Water Feature
In a typical yard that is up to one acre, hang Eradicators along the property line no more than 180 feet apart to create a mosquito barrier.	If you have a wooded area, hang Eradicators within the edge of the woods or heavily planted area to create a barrier between the woods and your living space.	If you have a wooded area, hang Eradicators within the edge of the woods or heavily planted area to create a barrier between the woods and your living space.	If you have a water feature, hang Eradicators close to the water feature, within 180 feet of each other, to create a barrier between the water feature and your living space.

Placement During Mosquito Season

Typical 1 Acre Residential Lot Mid-Season	Typical 1 Acre Residential Lot Mid-Season	Wooded 1 Acre Residential Lot Mid-Season	If you have a water feature, hang Eradicators close to the water feature, within 180 feet of each other, to create a barrier between the water feature and your living space.
In a typical yard that is up to one acre, hang Eradicators along the property line no more than 180 feet apart to create a mosquito barrier.	If you have a wooded area, hang Eradicators within the edge of the woods or heavily planted area to create a barrier between the woods and your living space.	If you have a wooded area, hang Eradicators within the edge of the woods or heavily planted area to create a barrier between the woods and your living space.	

When to Deploy Spartan Mosquito Eradicators

Mosquito season will start at a different time each year depending on your location. Find your location on the map and get a head start on a mosquito-free property.

Remember, if mosquito season has already started, use two boxes per acre to get the established mosquito population under control.

★★★★☆ Doesn't work, scam probably

Reviewed in the United States on September 12, 2018

Verified Purchase

I bought 4 packs, total of eight for two acres. Analyzing the contents, it is yeast, sugar and probably borate. The concept is you pour warm water into the yeast to activate it. The yeast feed off the sugar and emit C02. Mosquito's fly in and drink the water/borate and die. This concept has been around quite a while using a pepsi bottle, google it. The thing is, the pepsi trap, like this, under real tests do not work.

The container is a long skinny smooth tube. It has six tiny holes up on top. Supposedly, the mosquito will, somehow, detect the C02, fly up to the tip of the smooth plastic tube and squeeze itself in this 4mm hole, tucking its legs and body in as it slides itself in this pin hole. Then once inside, fly down the narrow shaft take a drink of water, fly up the thin shaft, and once again tuck its legs in and squeeze itself through to fly away. This concept is so far fetched.

I would like to see real proof than unproven customer reviews. It would be great that the manufacture would show real data and show mosquito accessing these tubes as they say

Caveat Emptor

**This is a scam: Active ingredients: salt and sugar**

Reviewed in the United States on March 16, 2019

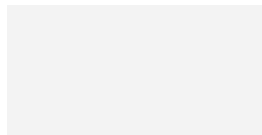

This product is a scam.

The "active" ingredients are salt and sugar.

You know, Malaria is a global problem. Don't you think that if salt (aka sodium chloride) and sugar (aka sucrose) could actually reduce or eradicate mosquitoes, this product would win the inventor the Nobel Prize?

The trap will collect some flies and bugs attracted to the sugar, but no mosquitoes.

Also, if you write a "bad" review, the sellers contact you and tell you that you aren't "installing" it correctly. You see, you have to put just the right number of traps in just the right locations in your yard. Yeah, right.

Customer

**Didn't work**

Reviewed in the United States on November 16, 2018

**Verified Purchase**

We have a terrible problem with both the Egyptian and Asian Tiger mosquitoes in our neighborhood. If I spend five minutes outdoors without repellent I'll collect at least another two bites. We've tried just about everything, and based on some glowing reviews we thought we'd try this too. At the mfr recommendation we put out four traps because it was late in the season. Did they help??

HA! I checked the traps several times over the course of the following months. Not only were the mosquitoes as bad as ever, the traps seemed EXCELLENT at trapping ants and gnats, but not a single mosquito that I could tell. I'd say don't waste your money.

Tammy

**Amazing Customer Service.**

Reviewed in the United States on July 4, 2018

**Verified Purchase**

Update: My first review I gave one star because they did not work for me. I am now giving 5 stars for customer service. Originally I purchased 2 sets (4 tubes total) installed exactly as instructed...right distance apart, away from where we sit, and in the shade... Added 2 more 2 weeks after. Mosquitos were still insane and i felt like it did not help at all. I have been sent another set to cover my acreage with instructions to use bottled water and a map of my property with ultra-specific instructions on where to place. Never seen customer service this great before. I am going to hang as instructed and really hope they work. If they do I'm going to always have

working sets hanging and encourage all my neighbors to do the same. I will update in a month with results. Very hopeful. Worth every penny if it will work.

Heather

★★★★★ **Works Great in Texas!**

Reviewed in the United States on July 23, 2018

**Verified Purchase**

We live in Texas a block from a creek in a neighborhood w/lots of trees. We typically have mosquitos swarming around our doors and find them in the house on a daily basis. We put a Spartan container at each of the front corners of our house and each of the back corners of our yard. Are they gone? No. However, it is a HUGE improvement!! Very satisfied customer.

☆☆☆☆☆ **Definitely wouldn't recommend these.**

Reviewed in the United States on October 20, 2018

**Verified Purchase**

These are useless. As another reviewer wrote, just look at the ingredients. I've noticed no change at all over the last few weeks these have been out. There are very few products that fit into the category of feeling like I was suckered for buying them and this is definitely one of those purchases.

★★★★★ **Game changer in South Texas**

Reviewed in the United States on June 17, 2018

**Verified Purchase**

GAME CHANGER! I deployed 3 around 2 weeks ago- so far- they are game changers. I couldn't sit in my south Texas heavily wooded backyard for more than a minute without being swarmed. That is no longer the case. Will update in a few more weeks.

★★★★★ **These things are the BOMB against Minnesota monster mosquitoes!**

Reviewed in the United States on June 27, 2018

**Verified Purchase**

With the amount of wooded area on our 3.5 acre property, plus all the Minnesota lakes surrounding us... our yard was practically a mosquito convention. Seriously, they were everywhere. EVERYWHERE. I could barely even walk out into our yard in the daytime let alone the evening without being covered in bites. But now... I can go out and enjoy it at any time of the day.. and even take a stroll in our woods which was IMPOSSIBLE before. Spartan mosquito eradicators WORK!

Run, don't walk to order yours today! Stop being breakfast, lunch and dinner for those devilish little vampires and go enjoy your yard!! You won't be disappointed! 😊
